

Municipal technology

Sprayable elastomeric coatings for combined heavy corrosion / wear protection. Applicable on site, can be repaired and helps to preserve assets

- Scraper blades of snow removal vehicles
- Salt dumping containers (winter service)
- Storage tanks of vacuuming machines
- Agitators in treatment plants
- Sand trap pumps
- Bulkheads

1 *Wear protection on solids conveyors in the sewage sector*
2 *Elastomeric coating instead of painting – sustainable and durable*
3 *Seamless, wear-resistant non-stick coating (salt container)*
4 *Heavy corrosion protection for Archimedean conveyors*
5 *Elastomerically lined seamless clarifier*
6 *Coated pump impeller after 34,000 hours of operation*
